

# AI Music Generation Platforms: Free Tiers & API Access

This report summarizes AI music generation platforms that offer free tiers or freemium models with API access, specifically focusing on **instrumental/music generation** as requested.

## 1. Top Recommendations (Free/Freemium with API)

Platform	Free Tier Details	API Access / Pricing	Key Features
Beatoven.ai	<b>Free Trial:</b> 1 Maestro music generation & 1 Maestro SFX generation per month.	<b>API Available:</b> Offers "Maestro Music" and "Maestro SFX" APIs. Commercial use cleared.	Best for background music, podcasts, and games. Focuses on ethical sourcing.
Mubert	<b>Ambassador (Free):</b> 25 track generations/mo, 10 downloads/mo. Requires attribution.	<b>Mubert API:</b> Available for developers. Pricing usually requires booking a call for high volume.	Generative streaming and track creation. High-quality electronic/ambient styles.
Loudly	<b>Free Plan:</b> Limited track creations, 1 download per day, non-commercial use.	<b>Music API:</b> "Learn More" section for integration. Built for scale and speed.	Extensive library and AI generator for various genres.
Sonauto	<b>Free Website Use:</b> Unlimited. <b>API Free Trial:</b> 1,500 credits (approx. 15 songs) for free upon registration.	<b>API Pricing:</b> Starter at \$11/mo for 20,000 credits. Pay-as-you-go available.	High-quality generation. API supports an <code>instrumental</code> boolean flag.
Stable Audio	<b>Free Plan:</b> 10 track generations per month (up to 3 mins each). Personal use only.	<b>Stability AI API:</b> 25 free credits for new users. Stable Audio 2.5 costs 20 credits (\$0.20) per generation.	State-of-the-art latent diffusion model. Excellent for high-fidelity instrumentals.
MusicAPI.ai	<b>Free Trial:</b> 5 generations (up to 10 songs) completely	<b>API Pricing:</b> Basic plan starts at \$8/mo	Aggregator API that provides access to

	free. No credit card required.	(billed annually) for 800 credits.	models like Suno, Udio, and more.
--	--------------------------------	------------------------------------	-----------------------------------

## 2. Platforms with Generous Free Tiers (Web-based/Limited API)

Platform	Free Tier Details	API Status
Suno	<b>Free Plan:</b> 50 credits daily (approx. 10 songs). No commercial use.	No official public API, but third-party providers (like MusicAPI.ai) offer access.
Soundverse AI	<b>Freemium:</b> Website generation is free.	<b>API:</b> Starter plan is \$99/mo. Website remains freemium for individual use.
AIVA	<b>Free Plan:</b> 3 downloads/mo, non-commercial use. Requires attribution.	API access is generally reserved for Enterprise/Pro users.

## 3. Open Source / Developer-First Options (Completely Free to Run)

If you have technical resources, these models can be run for free on your own hardware or via Hugging Face APIs (with free usage limits):

- **Meta's MusicGen (Audiocraft):** Available on Hugging Face. You can use the facebook/musicgen-small or large models. It is specifically designed for text-to-instrumental music.
- **Stable Audio Open:** A weights-available version of Stable Audio that you can host yourself for free.

## Summary for Instrumental Focus

For **instrumentals only**, **Sonauto** and **Stable Audio** are highly recommended due to their specific controls for instrumental-only output. **Beatoven.ai** is also a strong contender as it is built specifically for background instrumental tracks.
